Office Procedures During Covid

Welcome back! As we transition to in-person sessions, we are adding policies to reduce risk of virus transmission. Of course, you may continue with Zoom, if that's more comfortable/convenient for you. Highly rated air purifiers will be in the waiting room and my office to reduce risk of spread. Washing hands or using hand sanitizer is strongly recommended before and after sessions. Hand sanitizer is available in the waiting room.

First I am fully vaccinated, and will only see clients in person if they're fully vaccinated. This means having all recommended shots and waiting for the recommended time after your shots.

Second A Mask will be required in the waiting room and outer office at all times. You may take the mask off when you enter my personal office. I will not be wearing a mask during our sessions.

Let me know if you have additional requests. Thank you!

I agree to follow the terms listed above.
